- Technical Blogging

## Career Objective

A proficient frontend developer with over 2.5 years of experience, specializing in crafting dynamic, responsive, and user-centric web interfaces. Leveraging a solid foundation in backend technologies, I excel at collaborating with cross-functional teams to deliver scalable, high-quality web solutions. I am committed to driving innovation and enhancing user experiences through cutting-edge development practices.

## Work Experience

### Frontend Developer & Team Lead

#### Mad Brains Technologies LLP | Aug 2022 - Present

- Led a team of frontend developers, assigning tasks, reviewing code, and ensuring the delivery of scalable and maintainable features within project timelines.
- Developed and optimized scalable frontend architectures for complex web applications using the MERN stack.
- Designed and implemented reusable, high-performance components to streamline development and enhance maintainability.
- Integrated APIs with efficient state management, reducing redundant network calls and improving application performance.
- Optimized server-side rendering (SSR) and static site generation (SSG) in Next.js for improved performance and SEO.
- Worked closely with backend developers to ensure seamless API integrations and optimize request handling for improved efficiency.
- Mentored team members on best practices, debugging strategies, and performance optimization techniques.

## Projects

### Barbeque Nation

[Live Link](#)

★ Designed and built the entire frontend for **Barbeque Nation**, one of India's leading restaurant chains, focusing on a seamless digital experience. Developed features like online table reservations, voucher purchases, and food ordering while ensuring a high-performance, responsive interface across all devices.

**Technologies:** Next.js, Tailwind CSS, Zod, TypeScript, Redux Toolkit

### Farm-Crest

[Live Link](#)

★ Developed a high-performance, SEO-optimized website for **Farm-Crest**, an agricultural brand specializing in cocopeat fertilizers and farming solutions. The platform effectively promotes products, enhances customer engagement, and contributes to higher conversion rates through an intuitive UI/UX.

**Technologies:** Next.js, Tailwind CSS, TypeScript

### Gulfin

[Live Link](#)

★ Built the frontend for **Gulfin**, a real estate platform that enables users to search, filter, and explore property listings with advanced search functionalities. Collaborated closely with the backend team to integrate APIs, optimize performance, and deliver a smooth, user-friendly experience for property buyers and sellers.

**Technologies:** Next.js, Tailwind CSS, Prisma, TypeScript

### Template Studio

[Live Link](#)

★ Led the frontend development of **Template Studio**, an online marketplace for digital design templates. The platform allows designers to upload, showcase, and sell their templates. Integrated authentication, payment systems, and backend services to ensure secure transactions and a seamless user experience.

**Technologies:** Next.js, Tailwind CSS, Prisma, Express.js, Firebase
